Self Aligning Ball Bearing
1200 Series self aligning ball bearing-1217K

Designación de rodamiento	**1217K**
Dimensión （mm）	
D	85
D	150
B	28
rs min	**2**
Capacidades de carga básica (kN)	
Cr	49
Cor	20.8
Clasificaciones de velocidad (rpm)	
Grasa	3500
Petróleo	4100
Peso	
(Kg)	2.03

GQZ bearings wholesale high quality 1200 Series Self Aligning Ball Bearing

The 1200 series bearings contain models such as 1200 spherical ball bearings, 1200/C9 spherical ball bearings, 1200 bearings, KOYO 1200 bearings.

1200 spherical ball bearings are a kind of spherical ball bearings, its size parameters for the inner diameter of 10mm, outer diameter of 30mm, width of 9mm. this kind of bearings is suitable for the need to bear radial load occasions, has a good self-aligning performance, can reduce the mounting error on the impact of the bearing 12.

The 1200/C9 spherical ball bearing is another type with an inside diameter of 10.00 mm, an outside diameter of 30.00 mm and a width of 9.00 mm. Compared with the 1200 spherical ball bearing, the 1200/C9 may have specific design improvements or performance characteristics, such as higher speed capability or longer service life3.

KOYO 1200 bearings are KOYO branded products with the same dimensional parameters as 1200 spherical ball bearings, i.e. 10 mm inner diameter and 30 mm outer diameter.KOYO, as a well known brand of bearings, usually has a good quality and performance guarantee for its products.
