Series Naming Rule Explanation

1. Suffix P = Pillow Block; N = Slim narrow compact housing (narrower overall width, smaller footprint vs standard P base / heavy G deep base)

2. Middle code = Insert bearing locking structure

- EN (UEN) = UE concentric split collar insert (wide inner ring, 360° uniform clamping, bidirectional rotation)
- EN (LEN) = LE double-side extended inner single eccentric insert (triple heavy mud seal, unidirectional muddy sites)
- YN (UYN) = UY single-side extended inner single eccentric insert (double-lip seal, medium vibration unidirectional)
- YN (LYN) = LY economical single-side extended inner single eccentric insert (light dust seal, budget light load)
- KN+H (LKN+H) = UK tapered 1:12 bore insert + H split adapter sleeve (smooth unthreaded shaft, no shaft scratch)

Full complete unit codes:

- UENP = UEN Series (UE concentric insert + N narrow slim pillow block housing)
- LENP = LEN Series (LE dual extended eccentric insert + N narrow slim pillow block housing)
- UYNP = UYN Series (UY single extended eccentric insert + N narrow slim pillow block housing)
- LYNP = LYN Series (LY economical single extended eccentric insert + N narrow slim pillow block housing)
- LKNP+H = LKN+H Series (UK tapered bore insert + H sleeve + N narrow slim pillow block housing)
